OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 16.

THE RECLIFF REVIEW.

THURSDAY, SEPT. 8, 1927.

Number 36.

## Local Legion Held Memorial Service Sunday

WAS ATTENDED BY SIB BATT, AND LARGE NUMBER OF CITIZENS—THREE SPEAKERS TAKE PART IN SERVICE WHICH WAS VERY IMPRESSIVE.

The annual memorial service held under the auspices of the local Legion took place here last Sunday afternoon. The service took place in the cemetery and was attended by a large number of citizens. A feature of the day which added much to the success and impressiveness of the service was the attendance of the 31st Battalion and its band which was in camp for three days along the river just south of town. The band led the singing for the occasion in a very able manner.

Local veterans met at the Legion club rooms and marched in to the cemetery where they were joined by the battalion from the river. Arriving at the cemetery a square was formed in which the speakers for the occasion addressed the gathering. Mr. Rhodes representing St. Ambrose opened the service by his remarks, he paid tribute to the men who made the supreme sacrifice in the Great War, and said that their example was a reminder to us of the Great Sacrifice on the cross. This in turn should inspire all to so require their lives in service to their country so as to be able to put away false ideals, and cultivate a greater appreciation for the true.

Rev. R. K. Matheson in opening said this memorial service should serve to remind to all how time is passing, as it appeared but a very short time ago since a similar annual service was held.

Referring to those in whose honor the service was being held, he said they died in faith. Faith that the war in which they were taking part was one to end all wars. Faith that the principles of justice, liberty and truth would never again be challenged by arrogance and might. Speaking to the younger generation, he expressed the hope that they had better things in store for them than the life of the past had, and while they might not be called upon to die for their country they could not escape the call to live for their country. In closing he said: "We have a greater duty than to place a wreath upon the grave or to drop a tear; it is to match up to them. In the death of these brave men, the responsibility of carrying forward the ideals for which they fought, belongs to us. We must dedicate ourselves to the task. The great lesson which this men have taught us is that patriotism must be the expression in service for men."

Rev. M. C. Western, of St. Bernard's church, Medicine Hat, addressed the assembly principally to the young people who did not have the opportunity of serving in those flaming days but who still had the desire to uphold the high traditions set by the glorious dead of the war. He reminded them that as British subjects they belonged to a race that counts honor greater than ease and safety. It was, he said, to defend the honor of their country, that the British Empire unhesitatingly shed the blood. He reminded them also that they were successors to men who counted duty as their only pleasure; those who counted it better to give than to gain.

In closing, he said: "Civilization without Christ is doomed. Culture alone is unavailing to avert war. The ideals of Christ can alone teach men the art of peace and brotherhood. It was for the high traditions of honor, duty, patriotism and chivalry that the noble men whose memory we recall sacrificed youthful years and earthly pleasures and life itself. Unless we learn to live in the spirit in which they died we shall bring forth with us the same who sleep in Flanders Field. God grant that you may so live as to keep alive and ever brighter the traditions of the great few under which you serve."

During the service a number of appropriate and well known hymns were sung and this part of the service was deemed with the National Anthem.

Flowers were then placed on the graves of dead local soldiers, and the service was closed with the hymn: "The God of the Living and the Dead."

The singing of the Last Post brought this very impressive service to a close.

## Fatal Auto Accident Near Box Springs

Mervin J. Swenson Dies As Result of Accident Last Friday

Mervin J. Swenson, age 19, is dead. J. E. Alfrey is in the hospital badly injured and Gus Johnson received severe cuts on his hands, as a result of an auto accident between here and Box Springs school house last Friday evening.

The three men who are employed at the James Mitchell ranch north of the river, were on their way to a corn supper being held in the Box Springs school house that evening. While making a sharp curve in the road a tire came off the car which was a big Hudson, driven by Gus Johnson. This caused the car to turn completely over, rendering Swenson and Alfrey unconscious. Johnson was able to get out of the car, but the other two were taken to the Medicine Hat hospital. Swenson received internal injuries the result of which he was not at first apparent. Alfrey appeared to have been hurt the worst, but on arriving at the hospital it was found that Swenson was in a serious condition. He gradually grew weaker and on Saturday night he passed away.

The two other men are now in hospital. Swenson's home was in Medicine Hat, where he was attending school. He was not at first apparent. Alfrey appeared to have been hurt the worst, but on arriving at the hospital it was found that Swenson was in a serious condition. He gradually grew weaker and on Saturday night he passed away.

## LEAGUE TO MAKE MOVE TO OUTLAW WAR

The League of Nations Assembly which opened its eighth annual meeting Monday is determined before its adjournment to first vote on the assembly's declaration toward a general reduction of armaments. This is the climax of a long campaign for the abolition of war.

The failure of the Tripartite Naval Conference, in which the United States was represented a bare month ago and the previous attacks encountered by the league's own preparatory disarmament committee, have made the disarmament question a vital topic of discussion.

Almost without exception all districts of Alberta estimate big crops this year. The wheat crop is estimated to be at least 30 bushels to the acre, and some as high as 40.

## Churches

### ST. AMBROSE CHURCH

Mr. G. W. Rhodes  
13th Sunday after Trinity, Sept. 11th  
Sunday School at 10 a.m.  
Walker, celebrant at 11 a.m.  
Evening and Morning, 7:30 p.m.  
Kavanaugh and Sermon at 7:30 p.m.  
Tuesday—Children's Choir, 4:15 p.m.  
Wednesday—Jr. W. A. at 4:15 p.m.  
Thursday—Jr. W. A. at 7 p.m.  
Friday—Evening and Choir practice at 7:30 p.m.

### GORDON MEMORIAL UNITED CHURCH

R. M. Matheson, R.A. Minister.  
Evening and morning services, very cordially invited to attend the service and to share in the activities of Gordon Memorial church.  
Organizations meet as follows—  
The Official Board on 2nd Sunday in each quarter at 8 p.m.  
Committee of Disarmament on the 2nd Tuesday of each month at 8 p.m.  
Women's Missionary Society on the last Wednesday of each month at 8 p.m.  
Ladies' Aid, every Thursday, 9 a.m.  
Sunday, September 11th.  
10 a.m. Church School.  
11:15 a.m. Public Worship.  
"The Life-Giving River."  
7:30 p.m. Evening Service.  
The Song of the Vineyard.  
2:30 p.m. Rev. H. H. School and Public Worship.

### CHURCH OF THE BROTHERS

Rev. D. Hollinger, Minister.  
Usual services.

### ST. MARK'S CHURCH

Celebration of Mass, Second and Fourth Sundays of each month at 10 a.m.

## GENERAL MEETING OF LOCAL LEGION

The first general meeting of the local Legion, after the summer holidays, will be held in the club rooms next Sunday afternoon at 8 o'clock.

It is urgently requested that there be a full attendance as a representative of the provincial command will be in attendance, as well as a number of visitors from the Medicine Hat Legion. The meeting will be of importance in connection with a prize drawing which is an important matter concerning the local Legion will also be up for discussion. All members are urged to attend this meeting.

## Select and Cure Seed Corn Now

This Is The Advice Of Our District  
Agriculturist

To insure a dependable supply of seed corn it should be selected early, before severe frost, and carefully stored. The best seed corn to be had is that which ripens in the district where it is to be grown, it is more certain of producing a nation of good corn than that shipped in from several hundred miles south.

Corn of all kinds is later than usual this year on account of late planting, and the cool weather that we had during May and June, but a considerable proportion will make good seed if it is gathered before frost and cured thoroughly. If the first varieties have matured to glass they may be safely gathered, and if the dews show signs of drying they will cure into a good grade of seed.

As soon as the ears have been pulled off the husks should be stripped back or removed to allow the moisture to escape quickly. They may be tied up in bundles so that the air can circulate freely around them or they may be placed in a wire rack made by nailing chicken wire on each side of a two-by-four framework. It is important that the ears do not touch one another, and that there is free circulation of air in the room, and that the temperature of the room be above freezing point until the ears are well dried out. To be sure of this it is usually advisable to make provision for heating the room used for curing the corn. When the corn is completely dry severe frost will not damage it, but when it is full of moisture it may be completely ruined by frost even when under cover.

In a season when good seed corn can be secured it is advisable to save enough for top season planting and there are years when little corn ripens.

Keep the corn Rows in mind and show some of the best you have produced to see how it compares with that others have produced. Or better still attend one of the corn shows and see the different ideas for yourself. There is no better way to get to know seed corn.

JAMES MURRAY,  
District Agriculturist, Medicine Hat.

## Successful Social At St. Ambrose Hall

Larger Crowd Than Usual Present  
For Opening Societies

The St. Ambrose Parish hall was the scene last Monday evening of a very enjoyable social. The winners in the wheel drive were Mr. Norman Willis, Mrs. A. Fishberg, Miss Peggy Dang, as well as a number of visitors from the Medicine Hat Legion. A prize drawing which had kindly been given by the local Legion was also up for discussion. All members are urged to attend this meeting.

## Prince of Wales Joins The Wheat Pool

Other Notes of Interest Concerning  
The Pool

The E. P. ranch, owned by H.R.H. the Prince of Wales, has been joined to the Wheat Pool contract. The ranch contains a section of land and is located near High River, Alberta. The Prince was a recent visitor to his ranch and while there instructed W. L. Gerville, his farm manager, to have acreage placed under a Pool contract.

The Alberta Wheat Pool is not operating a course grain pool this year. Blank course grain contracts have been sent out and if a sufficient acreage is signed a course grain pool will be operated next year.

By the time the bulk of the wheat is moving in Alberta this fall, the Alberta Wheat Pool will have 155 line elevators completed and is operating. Yukaki Elhert, of the Japanese firm of Mitsubishi, Shoji Kaisha Ltd., Importers and exporters of Seattle, Wash., was a visitor at the Alberta Wheat Pool office this week. He is the most great deal of interest in the organization.

The first sample of this year's wheat to reach the Alberta Pool office was from the crop of Lacombe, of St. Mary. This wheat is an excellent No. 1 Northern and weighed 63 to the bushel. Mr. Elhert has 50 acres of wheat which has been cut but has yet to be threshed. The sample was taken from the Lacombe. Mr. Elhert is a member of the Alberta Wheat Pool.

The first passenger trip of the Lethbridge Commercial Airways was made on August 7th, between High River and Lethbridge by a plane piloted by Jack Palmer. It is announced that commercial flights will be arranged between Lethbridge and Waterton Lakes.

## Canadian Boy Is King's Chorister

When the boys of the King's Chapel in St. George's at Windsor and the Gentlemen of the Westminster Abbey Choir toured Canada this year on special Canadian Pacific train, the very Rev. Dr. Bailey, Dean of the Chapel and Rev. Canon Dr. Fellows were most impressed by the singing of Robert Charles Palmer, a 11-year-old Edmonton boy trained by V. P. Delong, organist and choirmaster of the Trinity Church, Edmonton.

South. Later in the year his parents, Colonel and Mrs. R. H. Palmer were notified that they had been appointed a probationer in the choir of the King's Chapel of St. George's. After a month of 12 months he will be taken into full membership as King's Chorister. Master Palmer who thus becomes part of an organization which has been in existence for nearly 500 years, is a member of the choir of the King's Chapel of St. George's. The choir has been in existence for nearly 500 years, is a member of the choir of the King's Chapel of St. George's. The choir has been in existence for nearly 500 years, is a member of the choir of the King's Chapel of St. George's.

## Remarkable Sights Seen in Sky Late

Midnight Rainbow and Three Moons  
Visible in Sky

The weather was most continuous in a freshish mood. On Wednesday morning the whole country was again drenched in rain. This might have been due to the low-pressure system which was all over, one of our esteemed citizens turned in a first alarm to his wife who on investigation found that the moon, being probably at atmospheric conditions, appeared much larger than usual. On the same evening our good friend, Mr. J. M. Wright, while out on a drop of Scotch blood in his veins or anything else Scotch in his system, when returning from the late train observed three moons in the heavens and about 9:30 on Tuesday evening a rainbow appeared in the northern sky. The moon was observed by a number of people some being sufficiently interested to phone to others.

The moon was low in a clear southern sky; here a light rain was falling; a heavy electric storm had swept to the west and across the horizon and at mid-heaven the lady blackness was relieved only by a few fleecy clouds. On this setting the low appeared full-crested and a perfect arch of light of the trans-Atlantic flight, and will probably have landed in Newfound by this time.

Several planes were killed to leave the other side coming this way any day now. In the meantime the air is full of anxiety for those who are now flying in all directions.

"St. Raphael," which left England for Ottawa, with Princess Louwinston and two men on board, is now long overdue and hopes for its safety are practically abandoned. After a search for days for the aircraft missing, which was said to have flown to Hawaii from the U.S., the search has been given up and there is no doubt now that all have perished. The Canadian liner the London, which was said to have flown from Newfoundland to London flight in the "Sir John Carling," are reported today to be somewhere off the coast of the Atlantic. They made a good get away from Newfoundland.

## Bad Wreck on the C.P.R. Near Calgary

Engineer and Fireman Killed And  
Passengers Are Hurt

Two trainmen were killed and two passengers slightly hurt, when Canadian Pacific passenger train second No. 1 and second No. 2, Imperial Limited, met in a head-on collision, at 1:46 o'clock yesterday morning, at a mile and eight-hundred miles east of Calgary, on the main line.

The engineer, J. H. Fay, on westbound train, residing at 718 Fourteenth Street, East, Calgary, instantly killed. Fireman E. E. Winfield, 2087 Seventeenth Street, Calgary, instantly killed. The names of two passengers, who were slightly hurt, were not available in first reports, but it was stated that the casualties were negligible and that no one died on a list of the Alberta Wheat Pool.

The investigation by railway officials has not progressed far enough, as yet, to determine the exact cause of a head-on smash.

Fortunately none of the baggage, express or passenger cars and sleepers on either of the two trains were derailed or derailed heavy steel cars prevented telescoping and consequent loss of life or injuries to passengers.

## ADVOCATES TEN YEARS OF SCIENTIFIC HOLIDAY

To Permit People to Catch Up With  
Its Discoveries

A controversy over the question of whether science should take a 10-year holiday to permit people to catch up with its discoveries has cropped up in the meetings of the British Association for the Advancement of Science.

The controversy has church representatives on one side and scientists on the other.

Rev. Edward Arthur Hatherleigh, Bishop of Ripon, suggested in a sermon Sunday that there should be a 10-year scientific holiday, during which every laboratory should be closed, in order that the world could assimilate evolutionary knowledge which he said glutted the world.

Dr. Arthur Keith, president of the association, Monday, said: "Under evolution lies great truths, that nothing can come to stand still. Even prehistoric man is still in the process of being adapted. The law of adaptation is universal and we are in a world of change. The 10-year time is impossible."

## Great Doings In Air During The Past Week

AIRSHIPS FLYING IN ALL DIRECTIONS  
IN ATTEMPT TO MAKE  
RECORDS—SEVERAL PLANES  
WITH PASSENGERS ARE NOW  
MISSING.

During the past week there has been great activity in airplanes in almost all quarters of the globe, but none of them appear to be any too satisfactory.

"Oli Glory," a U. S. plane which left Old Orchard, Mass., for Rome, Italy, on Tuesday, was in distress yesterday and has not been heard from since.

"St. Raphael," which left England for Ottawa, with Princess Louwinston and two men on board, is now long overdue and hopes for its safety are practically abandoned. After a search for days for the aircraft missing, which was said to have flown to Hawaii from the U.S., the search has been given up and there is no doubt now that all have perished.

The Canadian liner the London, which was said to have flown from Newfoundland to London flight in the "Sir John Carling," are reported today to be somewhere off the coast of the Atlantic. They made a good get away from Newfoundland.

The Windsor-to-Windsor flies on the "Royal Windsor" on an aerodrome of the trans-Atlantic flight, and will probably have landed in Newfound by this time.

Several planes were killed to leave the other side coming this way any day now. In the meantime the air is full of anxiety for those who are now flying in all directions.

## Former Farmer Premier Denounces Govt.

Says It Is Soviet Theory Borrowed  
From Marx

Deploring the United Farmers of Ontario and Miss Agnes MacPhail, spokeswoman for the United Farmers candidate in the North Huron by-election, at the annual meeting of the Wing government into a morass that will make the farmers of the province ridiculous, futile and lead to their destruction as a political force."

Ernest Harris Drury, former premier of Ontario, mirrored the North Huron campaign. Dr. Drury, an ex-minister of the late Sir John A. MacPhail, said that all she wanted to do was to change the government and to introduce the government system."

Dr. Drury observed, "I would like to tell you that such a fine open socialist theory, because it is borrowed from the materialistic theory of history proposed by Marx, has been tried only in Soviet Russia and there is the distrust of the people. Government which could not help but develop into government by bureaucracy cannot come in Canada until Miss MacPhail, following her power and authority that is far off. The present idea of government is a laying at the unsustainable man and it is to make the people of the world and all time as a force in politics for as long as it can."

## CANADIAN CANDIDATE FOR SEAT IN LEAGUE

Three Non-Permanent Seats Are Vacant This Year

"Sir Austin Chamberlain, British Secretary, told British newspapers that he would support Canada's candidacy for a non-permanent seat on the council of the League of Nations."

Mr. Randal Dandridge, Canadian Senator, was appointed chairman of one of the committees appointed by the assembly of the League of Nations. Senator Dandridge is chairman of the committee which deals with the following subjects: A. Disarmament, B. Economic conference, and work of various organizations of the League of Nations.

Senator Dandridge has been instructed it is understood, to put Canada forward as a champion for the following subjects: A. Disarmament, B. Economic conference, and work of various organizations of the League of Nations.

Three non-permanent seats become vacant this year. They are held by Belgium and Czechoslovakia.

## Its fine qualities preserved in the modern Aluminum package.

## TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good.

### Trees In Western Canada

In the great main-building work of settling the vast plains of Western Canada, one objection to overcome with many hindering settlers, especially from Ontario and other countries where woodland forests prevailed, was the lack of trees. To those accustomed to living in a wooded country, the bare prairie with its unbroken stretches of bare and farther than the eye could reach, presented a ghastly, inhospitable appearance. There was not only a lack of that peacefulness and beauty which trees provide, but an absence of protection from the elements when high winds prevailed, the snow drifted, and blizzards occasionally blew.

During the earlier days to the settlement of the West, many homesteaders travelled long distances from the area traversed by the railway to find locations in districts where there were trees from which they wanted, was not a mere temporary place where they could "make" the soil for a time, make some ready money quickly, and then get out, but a new and permanent home for their children where they would have a better opportunity in life than in the lands from which they came. They put up with inconveniences inseparable from their isolated locations solely because they preferred the wooded districts to the open, seemingly unattractive prairie.

In these early days, however, thousands of people came and took up homesteads who had no intention of establishing permanent homes. They were speculators, more or less indifferent to their surroundings, concerned only with the making of money as rapidly as possible. They were not at all inclined to settling their children in the West, but they were using it as a fall-way home, a stepping stone to some other and better place. Many came with the idea of making money which they could not accumulate in their Eastern homes and then returning there to live and ultimately die.

Some years ago the fact was borne into the minds of the Federal Government that the problem of peopling the West was not so much one of immigration as of colonization; but so much the obtaining of settlers as the retaining of them once they had come. In a word, the real problem was how to get people to regard the West as a place of permanent residence; how to get people to establish homes rather than to make a "boom" and go.

It came to be realized that a farm house, stable and barn set down in the midst of a flat prairie, utterly lacking in anything approaching beauty of location and surroundings, could never appeal to a "boom" and go. The parents still retained for the old homes they had left. And it was realized that what was needed to convert these flat prairie dwelling places into real and permanent homes was "trees."

There was an impression abroad, however, that trees would not grow; if they would, why was not the prairie country covered with them as was the case in other lands of vast virgin areas? But this was a mistaken impression, and it was argued that if from wooded groves elsewhere, they would grow on the rich, fertile plains of the West. And, always, some enterprising settler soon proved that this was so.

The problem of getting trees, getting them in large numbers and cheaply, became to many early settlers had little money to spend, and just the right way to plant and cultivate them, still existed. Then the Dominion Government inaugurated one of the finest of its many splendid services for agriculture when it established forestry farms in the West.

These farms have worked a valuable revolution in the appearance of the Western country. Established as they were, on the bare prairie, in a few years they were converted into miniature forests. From them have come fourth millions of trees, distributed free of charge to farmers all over the West. Reports have advised on trees.

Inspired, advice on planting given. Today, hundreds and thousands of Western farm dwellings have been transformed into homes of real attractiveness and beauty to which their owners and their children have become permanently attached and for which a real love has been kindled. Trees have proven a great and effective agent of colonization, while at the same time providing shelter for stock, protection for gardens, and a comfort to all who during winter winds drive across the land.

Prairie cities, towns and villages have caught the spirit and learned the lesson taught by these forestry farms, and formerly wholly unattractive places, as, for example, the capital city of Saskatchewan, where many families used to endow with their own assets, have become places of real beauty which are a source of pride and delight to their residents, and of surprise and pleasure to visitors from afar.

The Federal Government is deserving of all praise for its forestry farms and tree planting policy, and to an ever increasing extent it is to be hoped the people of Western Canada will second the efforts of the Government and even more energetically promote the work of surrounding their homes with trees.

### Flowers Made Of Rubber

Reproduction Are Very Realistic and Will Not Grow

Realistic reproductions of several different kinds of flowers are now being made from rubber by a patented process. They are colored in natural tints, a drop of perfume may be added to heighten the effect of genuine blossoms, and an additional feature is that the leaves and petals can be crushed or bent. One of the objections to flower toys, the rubber flowers may be quickly washed with soap and water and are so arranged that they may be opened or closed to represent fully blown blossoms or buds.

### BABES

The Shocher bull, King of the Prairie, recently sold for the Canadian ranch of H. B. H. of the Prince of Wales in a United States border, again won the premier prize at the Calgary Exhibition. The "King's" son Prince of the Prairie, however, lost out and had to sell his crest to Colgate White, Denver, belonging to S. A. Russell, of Toronto.

In a recent month nearly 50,000 pairs of leather slippers were sent from this of their country.

W. N. E. 1924

### New Use For Alarm Clocks

Worn Taps Business Men Of Time Limit For Parking

The alarm clock, faithful servant of the American home, now is employed as a warning that the bus time is up. Many automobiles have been parked long enough and that it's time to move on.

With a touch of parking limit in the business section of Toronto, Kansas, business houses have installed alarm clocks in their offices. At the end of two hours the alarm rings, a man gets up, hurries out and moves all the automobile belonging to employees. The alarm is not about two hours and the performance repeated. So it goes through the day.

### Paint a Corn With This Marvel Liquid

The paint takes in a few seconds. Tight shoes won't hurt anymore. Corns shrink up, and drop off. By means the whole corn and doesn't hurt. The corn is removed by the use of Corn Extractor. All druggists sell Putnam's Corn Extractor. Get it today. Before a substitute for Putnam's.

### Make Presentation

Seed Growers' Association Honors L. H. Newman At Ottawa

On the occasion of the recent conference of branch farm superintendents, the central experiment station, Ottawa, one of the most pleasing events was a presentation to L. H. Newman, director of the Canadian Seed Growers' Association.

R. R. Arvillid, director of the Canadian Seed Growers' Association, made the presentation, and the Hon. W. B. Motherwell, on behalf of the Canadian Seed Growers' Association, made the presentation, and the Hon. W. B. Motherwell, on behalf of the Canadian Seed Growers' Association, made the presentation.

### WEEK AND NERVOUS

The Condition Of A. E. I. Lady Who Again Rejoices In Good Health

"I can hardly remember Dr. Williams' Pink Pills to all weak and nervous. I had always worked hard, but with thought of my health, my strength left me. I began to feel tired and depressed. I felt as if I were in the morning as when I went to bed at night. I began to feel discouraged when I would think of the work I had to do. I began to feel discouraged when I would think of the work I had to do. I began to feel discouraged when I would think of the work I had to do."

Dr. Williams' Pink Pills do nothing and do it well. They build up the blood, and the blood supplies the whole body. The life is given in the entire system. Your body, steady nerves, improved appetite, and a good sleep. I feel as if I were in the morning as when I went to bed at night. I began to feel discouraged when I would think of the work I had to do."

### Leaves Valuable Estate

An estate provisionally valued at \$2,041,611 gross, was left by the fifth Marquis of Lansdowne, former governor general of Canada, who died at Clonsilla, Ireland, in June. It was shown by his will recently. The widow and the present marquis are the beneficiaries.

There may be other easy removers, but you will not be completely satisfied until you have used Hoffman's Corn Remover.

### Growing Tobacco In B.C.

Experimental crops of tobacco are being grown on 65 acres of land at Oliver, B.C. Fifty acres have already been planted to the satisfaction of Mr. Mettelle, of the B.C. Tobacco Products. Good progress has been made and the prospect is promising.

### Speed Hard To Imagine

Expect English Racing Plane To Travel 300 Miles An Hour

Some weeks ago an English army officer, in a speed test on a Florida beach, drove his car at a speed of 100 miles an hour. This is the greatest rate of travel ever made on a sort of machine driven on land or sea. But it is reported that an airplane has been made in which a formidable race which can develop a speed of 300 miles an hour. It would mean to travel at such a rate of speed. The fastest express trains rarely go faster than fifty or seventy miles an hour. Three hundred miles an hour is a speed greater than the average velocity developed by a bullet being falling from a great height. The French aviator Jean Vaux, flying over Beaumont-Claude, not into difficulties at an altitude of more than four miles, and jumped with his parachute from the machine. The parachute did not open until he was only 200 feet from the ground, but it jumped to save his life. From the moment he saved until the moment he landed, his parachute opened. It fell in less than half a second. That is the average rate of 300 miles an hour. And the mystery plane which is said, is capable of a speed 50 per cent. greater than that!

### Will Protect Fur Industry

Tax On Pelts Taken In Northwest Territories Effective January 1, 1925

The act imposing a tax on furs taken in the Northwest Territories, passed at the last session of Parliament, will come into effect on January 1, 1925, according to an announcement by the Hon. Charles Stewart, Minister of the Interior.

The tax in these territories was imposed by the Dominion in order to place them on the same basis as the various provinces, which with the exception of Prince Edward Island, impose a tax on furs to aid provincial revenues. The tax will be the same basis per pelts as in the various provinces and British Columbia, and will tend to prevent smuggling of furs from these provinces into the Territories for sale.

It is reported also that conservation of fur-bearing will be promoted by the new law in several ways. Pelts will be required to ship out furs and to be kept in a safe place, and the value of valuable animal pelts in shipment of considerable furs such as seal, otter, and all pelts will be examined and sealed.

This it is believed will check the pernicious practice of taking furs from the fur-bearing animals and selling them in the open market. Furthermore, this examination will also be a check on the fur-bearing animals and by districts, and provide data which will be of value from a conservation standpoint.

Recent and palatable. Mother Gwyn's Food Fortification is acceptable to children, and it does its work surely and promptly.

### Waterpower Resources

The official information available at central source regarding the waterpower resources of Canada, as to capacity, and availability is most complete. The Index, a new system of investigating and recording waterpower resources, originated by the Dominion Waterways and Power Department of the Interior and developed and carried out in full collaboration with the provincial governments, has translated its possible information on this subject regarding any river or district being available at the head office in Ottawa for any interested concerned.

Minerals Limestone for cuts and bridges.

### A Quack Society

One of the queer societies of Oxford University is the "Upland Upland Club." These ladies are the most of them go through a day doing every backwards, bending, twisting, and turning in the morning, they start with a glass and part as a tribute to a reversed dinner, ending with their exercises. No one is to be seen, until they eat breakfast and retire.

### To Visit U.S.

Former President of the United States has promised that he will visit the United States in 1925. He is now in Washington, D.C., and will visit the United States in 1925.

### WHEN USING WILSON'S FLY PADS

READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Push the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strongest. Leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.

Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

Historic Memorials

Massive Fortifications Of Fort Lennox On the Richelieu River

Among the historic memorials of Canada that have been from them is the place placed under the care of the Canadian National Parks Branch of the Department of the Interior. There is none richer in historic interest more charmingly situated than the massive old fortress, Fort Lennox, that stands in quiet dignity on the southern end of the aux Noix in the Richelieu river, in the province of Quebec. This fortress was erected by the British military authorities in the early part of the nineteenth century and shows the abandonment of the city in 1859 has been visited by increasing numbers of tourists each year.

Military Arms Powder, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system. They are the only medicine that works sure. There are many others that injure the system and are not effective a remedy for the relief of their children.

Greeks Reduce Army Strength

Good Army For Most Disturbed of Europe

The Greeks are getting rid of a whole Army Corps. Their present strength is 6,600 officers and 10,000 men. The Government is determined to reduce this figure by over 100,000 men, which will mean a heavy artillery and one engineer regiment. This is good strategy and the most distinguished corner of Europe. Portuguese are disbanding three light infantry regiments, three light infantry, and one cavalry regiments.

Alice cannot palpitation of the heart and shortens life three months, students in Western State College in Colorado have discovered. These 400 blinks would eliminate a full day of one's life.

For corns and bunions use Mjane's Liniment.

Ernie's husband in Central Africa has had a hard journey by the way, who have a firm belief that the human instinct of the lizard will be transmitted to their men.

### Fair Dates For 1923

Western Association Of Exhibitors Hold Meeting In Regina

At a meeting of the executive of the Western Canada Association of Exhibitors, held in Regina, recently, dates for the coming year were arranged as follows:

Brandon, July 2 to 6; Calgary, July 9 to 14; Edmonton, July 16 to 21; Saskatoon, July 23 to 28; and Regina, July 28 to August 2.

A meeting of the executive will be held in Toronto to interview Hon. W. B. Motherwell in regard to grants and other matters of common interest.

The various fair associations were represented by the following men:

From Regina, H. G. Smith, J. R. Martin, D. T. Dierksen and J. J. Robinson; from Saskatoon, Robert Calder, Archie Wilson, Sherif Thomas, and R. W. Johns; from Brandon, William Jennings, Archie McNeil, J. E. Little and A. C. Chapman; from Calgary, N. C. Christie, R. L. Adams and E. L. Richardson; from Edmonton, W. J. Stark was the only representative. President Nat Christie presided.

Children Cry For "Castoria"

Especially Prepared For Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years. It is a safe, reliable, and effective remedy for all the ailments of infants and children. It is a safe, reliable, and effective remedy for all the ailments of infants and children. It is a safe, reliable, and effective remedy for all the ailments of infants and children.

Castoria is a safe, reliable, and effective remedy for all the ailments of infants and children. It is a safe, reliable, and effective remedy for all the ailments of infants and children. It is a safe, reliable, and effective remedy for all the ailments of infants and children.

# The Story Of Garnet Wheat Epitomises History Of Wheat Breeding Work In Canada

Garnet wheat has in the last few years been very widely discussed and scientific journals and others have given it a reputation which it will find difficult to sustain. However, there has just been published a bulletin, written by Mr. L. H. Newman, Dominion Cerealist, which gives an authoritative and unbiased statement of what actually is known regarding the performance and quality of this new wheat in comparison with other varieties.

Garnet has a hardy ancestry. Its pedigree is traced back to Red Fife, the old Canadian standard variety, bred from the Lake Ladoga region in Russia, 600 miles further north than is the city of Winnipeg. Garnet's near ancestor is in Russia, one of the most northerly wheat growing districts in the world, and from 11,000 feet above sea level to the Himalayas.

From the cross between Red Fife and Ladoga came a strain which combined some of the good milling qualities of the Canadian Fife with the early ripening of the Russian wheat. Crossing this with a Russian strain in a wheat named Early Regina, a quick maturing variety giving a high quality flour, in 1905 a cross was made from a strain of Preston, called Preston A, and a strain of Red Fife, called Red Fife A. This was the new famous Garnet wheat.

It was not until 1914 that the new wheat was introduced in the registration of the Dominion Cerealist. In 1914 it began to be tested at the branch farms in the prairie provinces. The present Dominion Cerealist is taking stock of all the varieties on test in 1925 found Garnet to be especially promising. It has been found with one or two other varieties for special recommendation. By the spring of 1925 it had become reasonably clear that Garnet was a high yielding wheat of good milling and baking qualities, and it was decided to try it in a further field experiment. In 1925 11,000 bushels of seed were used in these field trials, and the results fully justified expectations.

The story of Garnet wheat thus epitomises the history of wheat breeding work in Canada. From the Central Farm, at Ladoga, during the past 40 years, and complete an appreciation of the man who conceived the programme followed—J. W. Wilson, Saunders, the first Director of the Farms System. This programme has been carried out by his successors, the discoverer of Garnet wheat, and by the present Dominion Cerealist.

## High Milk Production

Molteni Herd At Alberta Government Farm Makes Good Showing  
The Molteni herd at the Government Farm, near Edmonton, is giving quite a good account of itself, not only in the production of milk but in milk of high content. One of the herd bulls, Sir Silvia C. Horn 55,771, was bred by the Hon. A. C. Hardy, of Brockville, Ontario, 12 cows of his get recently showed a monthly average of 2.9 on daily test, the highest individual average being 4.5; 12 head, the rest of various other ages, showed an average of 3.3.

Heavyweight Pearl Knight 56,008, one of the cows of the herd, has a record of 18,900 pounds of milk testing on an average 3.25 when she was three years old. This bull is milked three times daily.

Moving Wheat Town  
The whole town of Poncha, Kansas and all, is going to take a ride to a new townsite near Lima, Cal. There are 40 houses which will be moved on flatcars by a crane, and immediately, may continue cooking and washing while the trip is in progress. The builder company expects the buildings to moving to a different location.

Develop Sodium Sulphate Deposit  
John M. Swain, of Edmonton, in association with H. B. Brown, well-known industrial chemist, is progressing with the organization of a company to develop the sodium sulphate deposit at Okla in the Canadian Northwest (Northwestern) line in Central Saskatchewan.

Get "Well, Dad, I'm engaged." "To whom?" "To a girl." "Oh, that's all right, but it's not of her."

W. N. E. 1921

## Egg-Grading Brings Results

Canada Has Reached High Place In Poultry Industry

At present in Ottawa the United Poultry Congress heard that Canada led the world in the consumption of eggs, having established a record of 127 per annum or very nearly one egg daily throughout the year for every one of the inhabitants, men, women and children. Figures stated show that the United States could achieve in that direction was 207, Belgium beating it out by reporting 213. Great Britain goes along with the modest number of 110, ahead of Norway, Sweden and Denmark, but behind Germany and France.

The high place taken by Canada in the poultry industry is largely due to the remarkable activity shown by the Federal and Provincial Departments of Agriculture and to the educational work of institutions like the Macdonald Agricultural College in Montreal and the Ontario Agricultural College at Guelph. To these agencies is mainly attributable the high standard of stock as well as the improved methods of feeding and marketing now prevailing. The aggregate annual production of poultry and eggs in Canada, "Egg Day" placed at \$20,000,000, revealing the poultry industry as an adjunct of agriculture of national importance.

The Canadian Poultry Association has also greatly aided the industry by adopting a standard of egg-grading, now legally effective, and by the bulk of inspection of exports and inter-provincial shipments. The improvement in quality and stability has become so apparent in the export trade that the better grades of Canadian products brought as much as twenty cents a dozen higher than the nearest competitor on the Glasgow market. This simply repeats what has followed the standardization of other commodities. Producers who oppose a system necessary of secure and stable confidence of foreign markets are lapsing in no way from common sense.

## Gold In Canada

Precious Metal Found In Every Province In Canada—New Discovery  
Gold has been found in every province of Canada except Prince Edward Island. The first recorded discovery was made in 1821 on the Illinois River, 50 miles south of Quebec city. Placer mining operations commenced in 1847 and intensification of these have been carried on ever since. Placer discoveries were made in Ontario, British Columbia, and in Yukon Territory at much later dates. Lode mining for gold began at Tumbler River, Nova Scotia, in 1858. Later the first production of gold in Canada was 1,729,890 ounces, valued at \$57,070,000. Approximately 85 per cent of this production was obtained from mines in Northern Ontario, and 14 per cent from British Columbia.

Slavery recently has been abolished in the state of Kalat, Baluchistan, a dependency of India, where it has been in force since the sixteenth century B.C.

Amidst his wholesome and commendable, but, in order to satisfy it, must recognize reasonable limitations.

## Canada Bound To Progress

Sir Henry Thornton Says This Is Dominion's Century

"This is Canada's century," declares Sir Henry Thornton, president of the Canadian National Railway, in an address before the board of directors of the Dominion Board of Trade. He has every advantage of soil, and inferior people and transportation facilities, but when I look back at the history there seemed to be a feeling of depression pervading the land.

"I admit I deliberately set out to reach optimism. It was necessary to have courage to turn the resources to advantage. Today the morale of the country is all that could be desired. This morale, and the fertile soil, good water power and all the natural resources and advantages which are to be found in Canada are bound to make for progress."

"I repeat this is Canada's century. This century will go through the same stages of development as did the United States. Capital will flow in and immigration will be actively encouraged."

## Whales Becoming Extinct

Draught Animals Needed To Protect Mammal Says Explorer

On this continent we are all on familiar with the story of the whale that was killed by a small party of men who came from Australia of the approaching end of the world.

Discussing the need for immediate draught animals, one authority says that at present the world is short of draught animals. The world would have only about ten years to give them out. The Antarctic explorer, Sir Douglas Mawson, said he had taken many millions of years to develop. They were of great economic value. Young whales were very few, and from the economic as well as the humanitarian point of view, it was necessary to preserve them.

Happily the buffalo has been saved, but whales multiply very slowly, and governmental action cannot come too soon. We wait the whale saved for economic and sentimental reasons.

## Make It Voluntary

Not Necessary To Register Vow To Do Kind Act Regularly

I do not care for the man who has registered a vow to do a good act every day. A better plan is to do a good act when opportunity occurs, naturally and easily, and without the expenditure of great effort. A gentle mind will do good acts every day, and will not feel the need to register a vow to do a good act every time a man refrains from being a bore; every time he is polite; every time he properly looks after his legitimate interests; and saves the world from supporting another grumbling poor man.

## Worth While Friends

Peter Chubberson, farmer of Humberfield, Iowa, died last week. He was a man of great worth and was well known in his community. He was a man of great worth and was well known in his community. He was a man of great worth and was well known in his community.

# Seeds From Western Trees Are Being Sent Abroad To Reforest The Empire

## Favourable Employment Situation

General Improvement Is Registered In All Industries

There were "favourable increases" in employment at the beginning of July, according to statistics published by the Dominion Bureau of Statistics from the 1,017 firms establishing 19,616 employees, or 1,186 more than on June 1. This increase which was larger than on July 1 of any other year at that record showed the index number to 1913, as compared with 1913 in the preceding month. The situation continues to be decidedly more favourable than in any other month of the years since 1920.

General improvement was registered in all industries except logging, which showed seasonal curtailment. The largest gains were reported in construction in which they were greater than on July 1 of any other year of the record.

The trend was favourable in all provinces, the most noteworthy expansion taking place in the Maritime Provinces and Quebec.

## Pure Seed

Canada's Seed Grading System Held In High Regard

Commerce in Seed Grading in Canada is conducted on a basis of legally defined quality, and the quality of seed sold must conform to prescribed grade definitions. This involves responsible duties for the inspectors of the Dominion Seed Branch, Department of Agriculture, who grade all agricultural seed and a large part of the seed for garden vegetables.

Seed of the western variety, the well-known source of shingles, about which have been some complaints and inquiries had the illustration been drawn from that variety of Canadian trees. The grain is composed of the seed of a tree, the bark of the parent tree, but the seed of the Shiga spruce is only one-thirtieth of the seed of a tree. The seed of the Shiga spruce is only one-thirtieth of the seed of a tree. The seed of the Shiga spruce is only one-thirtieth of the seed of a tree.

To give an idea of what this means, comparison may be made with some of the new 'fash' vegetables and seed sold in stores. Shiga spruce seed is sold in bags of 100 pounds, and is sold in bags of 100 pounds.

Words rule our lives. They define our conduct and determine all our actions. These intangible, intangible symbols, that cannot be weighed or measured in importance, are all material things. Words are sharp and to the sword and eviler than the lightning bolt. They strike us in action and stand up to despair. Their touch is a curse, a sting or a blow. They define every passion of the human heart. They can inspire, anger, bring resentment or lead despair. Yet words are as intangible as a butterfly, as slender as the gossamer chrysalis that drifts and shimmers in the morning sun, as fragile as the petals of a rose.

Clockmakers Were Puzzled  
Over the gateway of the second quadrant of Glasgow City is a wonderful astronomical clock which shows the twelve signs of the zodiac, the rising and setting of the sun, the revolutions of the planets, and the various phases of the moon. Some years ago when new works were put in, the clock was taken down for repair. Its complicated system had the clockmakers, who had to call in an astronomer to help them.

Simplified Writing  
The power to teach a totally illiterate person to read and write in twenty hours is claimed by a woman of the name of Mrs. J. M. J. and simplified method of handwriting based on the principle that all letters are formed with straight lines and circles. She has been able to treat her method on young soldiers of the last unimportant regiment, which included no fewer than 1,000 men who were completely illiterate.

One ton of coal, recently sold at the University of Minnesota, produced a small quantity of combustible gas, 15.2 pounds of coal, 24 pounds of wood alcohol, 100 pounds of wood tar and 622 pounds of charcoal.

Customers—'I'm not satisfied with this parcel. It won't hold unless I give him a half-dozen oranges.' 'Click!' 'I forgot to mention that that parcel is strictly an after-dinner speaker.'

Many a blessing to disguise effectually escapes detection.

## Seeds From Western Trees

Are Being Sent Abroad

To Reforest The Empire

Several years ago the British reforestation authorities engaged in the Western Provinces of Canada. The Department of the Interior that it could materialize their work by the collection of seeds of "western trees." The collection was set up on and on, in addition to the large seed-extraction plant at Vancouver where seeds of all sorts of British Columbia are collected, three smaller plants are maintained. These latter are located at Rocky Mountain House, Alberta and at Indian Head and Prince Albert in Saskatchewan. The seed is sent to Britain, where it is supplied for experimental and reforestation work in the forest service and elsewhere.

Last year about 11,000 pounds of seed and half tons of seed were extracted in these "establishments," about which have been some complaints and inquiries had the illustration been drawn from that variety of Canadian trees. The grain is composed of the seed of a tree, the bark of the parent tree, but the seed of the Shiga spruce is only one-thirtieth of the seed of a tree. The seed of the Shiga spruce is only one-thirtieth of the seed of a tree.

## Agriculture Gains New Prestige

Rising Respect Is Shown For the Hard Working Farmer

Agriculture in its present forward march in scientific progress is gaining new prestige for the farmer. Hon. W. B. McLeod, minister of agriculture in the King government, stated in addressing the convention gathering at Macdonald College, Montreal, at a luncheon which followed the conference of I.A.D. degree of McGill University, on Edward House, P.L.S. of London, England, president of the World Poultry Congress.

In the conversation which did honor to a "farmer," a non-university man who has devoted his life to the development of an important branch of agriculture—poultry husbandry, the minister of agriculture saw the proof of the rising respect for the importance of modern agriculture. "This convention," he said, "has made me feel that not only his own, but farmers in general are winning the universal respect they deserve. He found this an obvious tendency of the times, those looked upon as a hardworking necessary and useful agriculture is now honored by the universities of the world, he continued.

## Many Applications Received

Saskatchewan Farmers Want To Register Name Of Home

A number of applications have been received by the Department of Agriculture, for the registration of the names of homes, according to P. H. Judd, Deputy Minister of Agriculture, who says there are many names and homes in Saskatchewan which have not yet been registered. For the past two years the "Name of Home Act" shows a certain amount of protection to those who are using names and have not registered them. After May 1, 1926, when the act has been two years in force no patent against the use of a registered name can be effective.

## Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which was organized in 1914, has a membership of 1,000. It is a union of newspaper workers in Winnipeg, Manitoba. It is a union of newspaper workers in Winnipeg, Manitoba. It is a union of newspaper workers in Winnipeg, Manitoba.

### Interesting Local Items

George Abbott, of Regina spent last week in town visiting his parents.

Mr. Geo. of Inisfall, spent a few days in town visiting his daughter, Mrs. E. Waller.

We understand there is some talk of opening up the old Amuse-U theatre here in the near future.

Tom Eshelton, son of Drumheller, spent the Labor Day holiday here with his family.

Joe Taylor who has been in the Medicine Hat hospital for the past few weeks, has sufficiently recovered to be out around again.

Mr. and Mrs. P. Lavellan have been spending their holidays for the past week on a motor trip through the mountains.

George Young went into his swimming contest as number 12, but was number 1 coming out before the race finished. How the mighty have fallen.

Now that swimming contests are going for the season, manufacturers of swimmers' gear can turn their attention to manufacturing sport spots on which swimmers may light.

Mr. and Mrs. Connel and family returned late Saturday for the week end, visiting Mr. and Mrs. Charles Newsham. Miss Agnes Jones accompanied them back to Calgary, where she will spend a few days holiday.

In the first of the home and home games in the Bennett Shield finals Calgary defeated Michel 2 goals to 1. The next game will be played in Michel next Saturday. The total goals scored in both games will decide the winner.

Miss Mary Lang, teacher at the Box Springs school, entertained the pupils and parents and friends to a good old fashioned corn feed last Friday evening. The feed was followed by a jolly dance in the school. A most enjoyable evening was spent by all present.

Moving at any time is not the most pleasant pastime, but when one has a careful, palatable dryman like Bill Nutter the task is made much easier. Then when one gets to his new place of abode and finds that Fred Olin has been doing the decorating he is delighted to find that great care has been taken not to splutter flies and fixtures with paint and kalsomine. Under such conditions, moving is not so bad. The writer is speaking from experience of the past week.

Rain yesterday will delay harvesting operations but no serious damage has been done so far.

Rev. D. Hildinger has completed cutting his wheat and is now getting ready for threshing.

A married man with seven children is at it much more to live within an income than without one.

Mr. and Mrs. W. Pelano and Mrs. Guy Horne and family spent the week end in Calgary visiting Mr. and Mrs. A. Horne, who lately moved to Calgary.

Joe Delinks of Oliver returned last week end from Saskatchewan, where he had been disposing of a cow or horses. Mr. Delinks was in town yesterday on business.

One of our readers asks us to advise those who tether out cows to see that these animals are staked out far enough from the cemetery fence, to prevent them from getting at the trees. The time should apply to all parts of the town.

The Review is in receipt of a new item which was evidently intended for publication in this issue, but as no name was signed to it we cannot publish it. While we are always anxious to get news items of this kind we must insist on knowing the author, not necessarily for publication but as a guarantee of good faith. It sometimes happens that news items are sent to a paper as a joke. If they are published the joke is often on the Editor and sometimes it is an expensive joke at that. It is to guard against such a thing that all papers insist on knowing the source from which such items come.

"Who's My Wife"

There was a jolly crowd of young folks at the dance last Friday evening at the auspices of the Deo Dada orchestra. All report a most enjoyable evening.

Mr. and Mrs. G. H. Werts and family returned to Rivoli, Sask. last week end to visit friends over the holiday. Owing to the drop in the temperature, the swimming pool has been closed for the season.

Anny Slater was the road race which started from here on Labor Day. He was 1 minute and 10 seconds ahead of his nearest competitor, W. Windland. J. Conn came in third. The time for Slater was 47 minutes and 20 seconds.

C. Beck of the Bingville passed through town last Friday with the first load of this year's wheat. It graded to 1 northern and weighed 65 pounds to the bushel. Crops in the Bingville district are in excellent condition and sitting was in full swing before the rain.

Mr. and Mrs. Fred Jones had quite a surprise Tuesday, Aug. 29th, when a number of friends sent some lovely present of silver, and congratulating them on their silver wedding anniversary. A congratulatory card was also received from Mr. and Cooper in England.

E. J. Crowe, a former resident of Redcliff, but who has been a prosperous fruit grower in the States of California for many years, has sold his fruit ranch and has moved to Petrolia, where, where he will reside in future. Mr. Crowe is said to have owned one of the finest fruit ranches in the State.

Vego Lodge has completed arrangements for the dance which they are putting on in Cliff hall on Wednesday evening, Sept. 21st. Dancing from 9 p.m. to 2 a.m. Good music and refreshments will be provided for the occasion. Admission \$1.00 a couple, extra ladies 50c. All are cordially invited to attend.

Miss Ireland, who came to Canada as a delegate from Scotland to the World's Poultry Congress, spent a few days in town last week visiting her aunt, Mrs. John Ellis. She also spent a few days in the country visiting her cousin. Besides attending the convention, Miss Ireland has just completed a tour of Canada from Halifax to Victoria. Miss Ireland assured the Review she would return to Scotland a great booster for Canada as a land of marvellous scenery and wonderful opportunities. She was very much impressed with the successful manner in which the convention was conducted and also with the vastness of Canada and its resources.

Mr. A. Bath of the Bingville district left last week end for Vancouver where he will make his home in future. Mrs. Bath and family are already settled there.

Play in the tennis tournament has been somewhat delayed during the past few days owing to the wet weather. However, the schedule is well under way and will be completed just as soon as weather permits.

Word has been received from Rev. and Mrs. Cooper announcing that they will leave England for Canada on Sept. 20th. Mr. Cooper expects to be here in time to take the regular service in St. Ambrose the first Sunday in October.

There was considerable excitement in front of the post office yesterday when a two-round bout was pulled off. The first round was between a boy and girl—brother and sister—and the second round between the winner of the first bout and her father. For a while it looked as though the girl had her father down for the count. But she came back strong before the 12 o'clock whistle blew and landed a nasty smack on the sinner's plump which brought calm and tranquility to the belligerent pair. After cranking the car, the fond parent and his family drove home to enjoy their mid-day meal.

**GORDON MEMORIAL NOTES**

The official band met on Tuesday evening and decided to hold the anniversary service this on Sunday, Sept. 25th. The motion also provides that the anniversary of Gordon Memorial secondary school will fall on the last Sunday in the month of September.
